SVIN 2018 MEETING HIGHLIGHTS

NEW PROGRAM FORMAT AND FOCUS

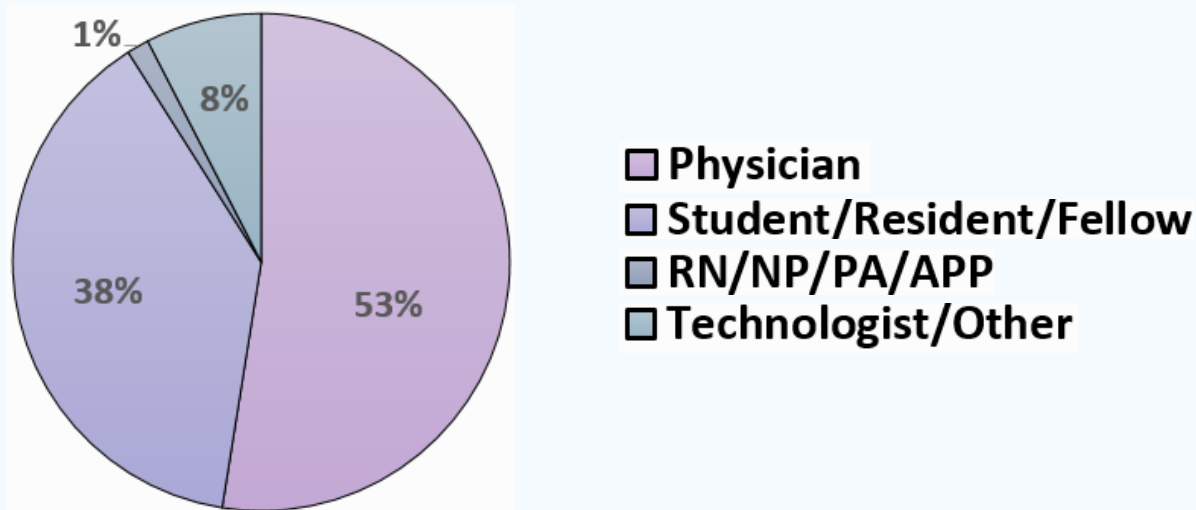

Coming off of one of the most remarkable years in Acute Stroke treatment, The Society of Vascular and Interventional Neurology (SVIN) welcomes you to our Annual Meeting in San Diego, California, November 14-17, 2018! This year's Annual Meeting theme is "The Wave of the Future: Enhancing Synergies" and will bring with it a new and exciting format!

The new format brings in all of the previous success of the Annual Meeting and the Stroke Center Workshop and includes two new tracks geared towards Advanced Practice Providers on the second day and Vascular Neurologists and Neurohospitalists on the third day. Additionally, there will be a fellows course offered on Saturday afternoon where sponsors can demonstrate their technologies and devices. Fellows-in-training will register in advance for the session and rotate through each station. The first day of the meeting will again be chaired by Thomas Devlin, MD and Jawad Kirmani, MD, but this time starting with our stroke care didactics and building on the first day in order to decrease topical repetition throughout the meeting and bring in several new sessions on stroke treatment and care. Day 1 will continue to be attended by hospital administration, nurse leaders, physician leaders, stroke neurologists, critical care physicians, neurosurgeons and neuro-interventionalists, industry leadership, emergency room physicians and nurses, EMS leadership, interventional lab staff and directors, advanced nurse practitioners, residents, and fellows.

ABOUT THE SVIN MEETING AND ATTENDEES

The SVIN Annual Meeting continues to be the premier academic venue with scientific presentations covering the full spectrum of cerebrovascular diseases and stroke. Our speakers are the leaders in stroke research and endovascular treatment. This year will include two new parallel tracks and a fellows course to include more education for the "Stroke Team" including but not limited to nurses, advanced practice providers, coordinators, hospitalists, and vascular neurologists. Topics to be addressed include large vessel occlusion (LVO) stroke; intracranial atherosclerosis, PFO closure, stem cell therapy for stroke; aneurysm treatment with coiling or flow diversion; arteriovenous malformations, dural arteriovenous fistulas, neurocritical care, and other related topics. The two new tracks include pseudo-live case presentations (pre-recorded cases) and a complications and saves session. Given the high level of the field-specific presentations, we anticipate continued attendance by a large proportion of Neurointerventionalists, Interventional Neurologists, Interventional Neuroradiologists, Endovascular Neurosurgeons, Vascular Neurologists, Neurointensivists, and other related Neurological or Endovascular Practitioners. Additionally, we expect a significant increase in participation from Advanced Practice Providers and Vascular Neurologists compared to previous years.
