SVIN Awards and Grants

SVIN offers a multitude of awards and grants during the Annual Meeting to encourage research in the field. These awards include; Pilot Grant Research Award, Best Abstract Award, and the Young Investigator Award. The goal of the Pilot Grant Research Award is to help initiate pilot research projects that will further the field or understanding of Vascular and Interventional Neurology. The Best Abstract Award is given during the meeting for an outstanding scientific abstract submitted by a member of the Society, and lastly the Young Investigator award is given during the meeting for an outstanding abstract submitted by a junior member of the Society (student, resident, or fellow).

Awards and Grants Funding Level: \$50,000

This funding will do the following to enable SVIN to do the following to support Awards and Grants:

MISSION THROMBECTOMY 2020+

Mission Thrombectomy 2020+ (MT2020) is a SVIN initiative with the goal to increase global access to stroke care and mechanical thrombectomy.

In 2020, the initiatives of MT2020+ focused on fulfilling the committee's purpose within SVIN through its mission to increase access to stroke care and mechanical thrombectomy globally. Currently, there are over 80 Regional Committees (RCs) that have been activated with 400+ members worldwide. Approximately 60 of the RCs have formally met to discuss challenges, barriers, and opportunities in their specific regions to focus their efforts on for the upcoming year.

The initiatives for MT2020+ in 2021 include multiple projects that provide industry with an opportunity to give input, attend, and participate in MT2020+ action items and events. The total annual cost to meet these goals is \$955,000. The funding breakdown is given below.

PROJECTS	PROJECT DESCRIPTION	FUNDING REQUEST
MT2020+ Project Management & Administration, Meetings & Operations	<p>MT2020+ continues to foster a strong partnership with its project management and consulting teams. These teams assist</p> <p>MT2020+ in reaching its fullest potential in its partnerships and projects.</p> <p>MT2020+ seeks support from these teams on projects relating to global outreach initiatives, research and collaboration, and day to day operations. This collaboration is vital expansion of projects. With over 80 countries involved in MT2020+, the successful support of the operations team to ensure efficacious administrative support and collaboration across these regions will be defining moment for the future of MT2020+. The ability to enhance global access for stroke care and mechanical thrombectomy is pivotal to the success of MT2020's global initiatives. With high hopes for a hybrid environment at the SVIN Annual Meeting, the committee is optimistic about offering opportunities to meet and collaborate in 2021. In addition, there are opportunities to share best practices in increasing access to stroke care in a virtual environment.</p>	<p>Project Management & Administrative Support: \$130,000 Marketing: \$30,000 Technology: \$100,000 Other Costs: \$15,0000</p> <p>TOTAL: \$275,000</p>
Activation and Organization of the MT2020+ Regional Committees	<p>The MT2020+ Global Executive Committee has been hard at work over the last year to activate its Regional Committees. These committees provide critical input and aid in the expansion and implementation of the global strategic plan by collaborating with other regions that may not share similar roles and functionalities. MT2020+ has further developed the organization of its regional committees to ensure the development and implementation of tasks at the local level in each region/country. Currently, there are over 50 Regional Committees activated globally.</p>	<p>Project Management & Administrative Support: \$250,000 Registry Support: \$35,000 Technology: \$80,000 Marketing \$30,000 Meetings: \$45,000 Other: \$20,000</p> <p>TOTAL: \$460,000</p>
Mechanical Thrombectomy Access Score	<p>As MT2020+ has continued its mission to increase access to stroke care and mechanical thrombectomy globally, we are committed to measuring the various levels of access to ascertain areas of need to collaborate further. The mechanical thrombectomy access score uses a Modified-Delphi method to establish areas of need to further collaborate and ensure timely access to stroke care.</p>	<p>Project Management, Consulting & Administrative Support: \$30,000 Research Assistant: \$40,000 Literature Review, Modified-Delphi Method, Analysis, Writing, Editing: \$60,000 Translation Fees: \$30,000 Technology: \$40,000 Marketing: \$20,000</p> <p>TOTAL: \$220,000</p>

WHO WE ARE
