SVIN 2017 MEETING HIGHLIGHTS

ABOUT THE STROKE CENTER WORKSHOP

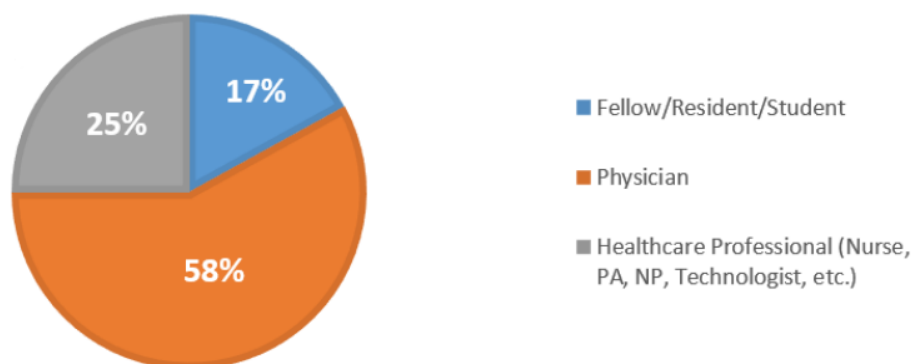

The Stroke Center Workshop will kick-start the Annual Meeting. There is an unmet need for expanding stroke centers of excellence across the country and healthcare systems, stakeholders involved in the stroke chain of survival, and industry need to join hands in making this a reality. This workshop is intended to bring together healthcare systems, hospital administrators, physician and nurse stroke champions, emergency department (ED) and emergency medical services (EMS) leaders, and industry leaders (Tele-health, Pharmaceutical, and Medical Device) who are interested in learning the requisite components of building, certifying and sustaining a successful stroke center. The Workshop will also highlight the business side of stroke and include a practical boot camp for developing a stroke center.

The Workshop will be attended by hospital administration (CEO's, COO's, VP's Business Development, VP's Neuroscience), Nurse leaders (CNO's, VP's Quality), Physician leaders (CMO's, Stroke Medical Directors, Stroke Neurologists, Critical Care Physicians, Neurosurgeons, & Neuro-Interventionalists), Industry leadership (CEO's, CMO's, CTO's, VP's of Medical Device, Pharmaceutical and Telemedicine companies), ED leadership (ED Directors, ED Medical Directors), EMS leadership (EMS Medical Directors, EMS/Fire Chiefs), ICU leadership (ICU Directors, Neuro ICU Medical Directors), Interventional Lab leadership (Radiology Directors, Supply Chain Management), Advanced Nurse Practitioners, Residents and Fellows.

ABOUT THE SVIN ANNUAL MEETING

The SVIN Annual Meeting is a premier academic venue with scientific presentations covering the full spectrum of cerebrovascular diseases and stroke. Topics to be addressed include large vessel occlusion stroke; cerebrovascular neuroanatomy, intracranial atherosclerosis, PFO closure, stem cell therapy for stroke; aneurysm treatment with coiling or flow diversion; arteriovenous malformations, dural arteriovenous fistulas, venous stenting, neurocritical care, technical video case reviews, complications, and other related topics. Late breaking science and innovations will be presented at our meeting including an in-depth analysis of the DAWN trial and discussions on selection of patients in late time windows. Our speakers are leaders in the field. Given the high level of the field-specific presentations, we anticipate continued attendance by a large proportion of Neurointerventionists, Interventional Neurologists, Interventional Neuroradiologists, Endovascular Neurosurgeons, Vascular Neurologists, Neurointensivists, and other related Neurological or Endovascular Practitioners.
