Program: Surgical and Interventional Approaches to Pediatric Cerebrovascular Disease

Subspecialty: Endovascular Surgical Neurology

Organization Name: Boston Children's Hospital Cerebrovascular Surgery & Interventions Center

Program Director Name: Darren Orbach, MD PhD & Edward Smith, MD

Phone Number (with Country and Area Codes): 617-355-5012

Email Address: darren.orbach@childrens.harvard.edu

Contact Name: Arianna Lanpher

Phone Number (with Country and Area Codes): (617) 919-1379

Fax Number (with Country and Area Codes): 617-730-7636

Email Address: cvdsurgery@childrens.harvard.edu

Mailing Address: 300 Longwood Avenue

City: Boston

State/Province: MA

Postal Code: 02115

Country: United States

2015: No

2016: No

2017: Yes

2018: No

2019: No

2020: No

Length of Program: 1 year

Number of Positions: 1

ACGME: No

UNCS: No

Institutional GME: Yes

Other Accreditation:

H1B: No

J1: Yes

Both: No

Fellowship Description. Feel free to add as much detail as possible regarding the position.: The Cerebrovascular Surgery and Interventions Center (CSIC) at Boston Children's Hospital is accepting applications for a 1-year fellowship position in Surgical and Interventional Approaches to Pediatric Cerebrovascular Disease. The fellowship will provide multidisciplinary training in the treatment of the full range of cerebrovascular conditions affecting children, including moyamoya, brain and spine AVM, pial, dural and extracranial AVF, vein of Galen malformations, arterial dissections, cerebral aneurysms, acute ischemic stroke, vascular tumors of the head, neck and spine, and venous and lymphatic vascular malformations. Primary supervising faculty mentors consist of one full-time pediatric vascular neurosurgeon and one full-time neurointerventionalist at Boston Children's Hospital. Boston Children's is the primary pediatric teaching hospital of Harvard Medical School, and draws an unparalleled volume of patients from around the world. CSIC is a global leader in pediatric operative and endovascular innovation, and trainees will benefit from its state-of-the-art equipment and facilities. In addition to clinical training, the unique patient populations and clinical volume provide incomparable opportunities for clinical and translational research, with research productivity expected as a strong component of the fellowship. Candidates must be graduates of a U.S. medical school or hold a valid ECFMG certificate and able to obtain a medical license in the state of Massachusetts, and must have had exposure to adult endovascular neurosurgical / neurointerventional training, either as a separate fellowship or as part of a neurosurgical residency. Applicants with backgrounds in neurosurgery, neuroradiology, or neurology are invited to apply, with operative neurosurgical training during the fellowship limited to neurosurgical applicants. Full salary and benefits are provided. Those interested should contact Arianna Lanpher at cvdsurgery@childrens.harvard.edu
